

ARTEMIS

allure models

the positive image of the modern woman
B E A U T Y , S T R E N G T H , & P O I S E

It's

FASHION

WE DON'T PUT
one or two TINY
photos in the
CORNER of the
PAGES.

WE give THEM
FULL SPREADS.

Artemis Allure Models Magazine is dedicated exclusively to fashion/fitness female models and actors. We focus on highlighting the well seasoned models and actors at the same time promote the aspiring talents. We also feature events such as fashion weeks and fitness competitions around the globe. AAM is photo-intensive and content-driven with articles and interviews from professional working models, actors, photographers, fashion designers, artists, make-up artists, stylists, talent agencies, advertising agencies, cosmetic lines, athletes and nutritionists. It promises to inform, entertain, and create jobs for those who work in this exciting industry. Furthermore, students in fine arts, photography, fashion design and physical and fitness can benefit by learning from the interviewees of Artemis Allure Models Magazine. We also look at different types of women's accessories and beauty products from issue to issue, as well as discussing a whole range of photography from artistic nudes to high fashion photography. Articles from models, personal trainers and life-style writers will contribute to the completion of the magazine.

Artemis Allure Models Magazine is all about the modern women of beauty and strength. From fashion models to fitness models to role models, we highlight and celebrate those who deserve the spotlight.

Artemis Allure Models Magazine contains:

- no hype
- no made-up pie chart of readership
- no foul language
- no frontal nudity
- no garish toppings
- no false promises
- and no gossiping

What we do have are:

- packed contents
- lots of photos and event coverages
- important figures in the industry
- dedication
- appreciation for our interviewees
- creativity
- connections
- and most of all, the love for looking real good, feeling healthy, and improving our lives!

It's

ART

WE GO FROM
